course introduction
A "cosmetic" is any substance used to clean, improve or change the complexion, skin, hair, nails or teeth. Cosmetics include beauty preparations (make-up, perfume, skin cream, nail polish) and grooming aids (soap, shampoo, shaving cream, deodorant). Currently, consumers of cosmetic are increasingly expressing a preference for products that contain naturally derived ingredients. This training is aimed to cater the needs of disseminating information on cosmetic formulations started from the ingredients used in the formulation to the physico-chemical and biological testing of cosmetic products.

course objectives
The course aim to:

- Provide information on current status of cosmetic products
- Provide the latest information on product and process development trend to product formulators, scientists, process engineers and entrepreneurs
- Investigate fundamental and practical aspects of product formulation and product quality
- Hands-on practical training in formulating cosmetic products

target participant
Individuals, researchers, students and entrepreneurs in the herbal and cosmeceutical industry and other fields who are interested in learning how to prepare cosmetic formulations and their transdermal carriers and evaluate transdermal diffusion. Participants will be able to brush up on their knowledge with regards to the skin as a biological organ and a barrier to overcome when delivering the active ingredient in cosmeceuti-cal products.

Typical attendees include those involved with:
- Research and Development
- Applications and formulation
- QC/QA
- Sales and marketing
- Regulatory

Dr. Rosnani Hasham
Dr Rosnani Hasham has completed her PhD in Biochemical Engineering from Dongguk University South Korea related to Skin Barrier Function and Anti-photoageing ingredients. She has also been involved in Aromatherapy and Holistic Massage from International Therapy Examination Council (ITEC), London. She has dedicated her career to the concepts of skin health and the development of aromatherapy techniques and formulations that help in restoring skin to its original health and beauty. She is currently IBD’s Research Associate, having been actively involved in R&D and commercialization of aromatherapy and cosmeceutical products for the past 14 years. She is also an advisor of Bakawali SPA at IBD, Universiti Teknologi Malaysia. She has lectured and conducted courses all over Malaysia and has taught her technique and philosophy to hundreds of aromatherapy practitioners.

Dr. Marni Abd. Humid
Dr. Marni Abd. Humid is a graduate from University Teknologi Malaysia of where she obtained both her BEng (Hons) in Chemical Engineering and MEng in Bioprocess Engineering. She obtained her PhD from Dongguk University, South Korea in Bioprocess Engineering. Her career at UTM began in 2001 where she was appointed as a research officer at Institute of Bioproduct Development. She was then appointed as a Head of Oleochemical Strategic Business Unit from 2002 to 2005. After completing her studies, she was appointed as an associate professor for the development of herbal based cosmetic product. She now focuses on the efficacy study of several types of Malaysian herbal extract by screening any potential phytochemical to be used as safe pharmacological and natural cosmetics ingredient. Dr. Marni is also the founder of Dermagas Skin Solution.
