It is clear from the Paris Agreement 2015 that most UNFCCC member countries intend to reduce greenhouse gas emissions in accordance with their respective ‘National Determined Contribution (NDC)’ target, in order to hold the ongoing rise in global average temperature to below 2 °C. Asian countries are characterized by strong economic growth and can provide significant potential in GHG emission reductions in various sectors. It is important to note that several mechanisms have been implemented in Asia, notably, low carbon city, local low carbon technologies, and innovative low carbon tools and models, including behavioral principle of low carbon and sufficiency thinking. Entering into a low carbon society requires the exchange and sharing of knowledge among countries of the continent.

The joint international conference incorporating the 3rd International Conference of Low Carbon Asia and Beyond (ICLCA 2017) and the 6th Annual Meeting of the Low Carbon Asia Research Network (LoCARNet), aims to provide a high-impact platform bringing together researchers and multi-stakeholders from academia, government and industry in Asia to share their expertise, knowledge and experiences in order to facilitate and catalyze the transformation of Low carbon society in Asia and beyond.

The 3rd ICLCA and the 6th LoCARNet Annual Meeting will invite well-known keynotes speakers from all over the globe to light up perspective view and enable participants with the low carbon society to the sustainable development in Asia.

Topics

Building and Design

- Green Building and Net Zero Building
- Sustainable Design and Architecture
- Green Design

Urban development

- Low Carbon City
- Sustainable Solid Waste Management
- Low Carbon Transportation System
- Creative and Smart IT for Urban Development

Land Used and Agriculture

- Land Use change and Forest
- Climate Smart and Sustainable Agriculture

Energy System and Scenario

- Smart and Sustainable Energy System
- Renewable Energy- Technology and Potential
- Energy mixed
- Low Carbon Scenario
- Optimization, Modeling and Simulation for Sustainable Development

Policies and Mechanisms

- Green Policies
- Carbon Mechanisms
- Low Carbon Finance and Economy
- Carbon Capture & Sequestration and Utilization

Behavior Change and Consumption

- Green Tourism
- Environmental Assessment and Indicators
- Sustainable Production and Consumption
- Behavior Change and Ecosystem Service
- Public Participation and Consensus Building

Guidelines for Abstract & Full Paper Submission

Download the Abstract & Full Paper Template at www.iclca2017.com

Submission of Abstract and Full Paper should be completed through the EasyChair link at www.iclca2017.com
