INTRODUCTION

Nowadays

Manufacturers are competing on the supply chain to satisfy customer needs.

Relationship structure

The relationship structure of manufacturer and supply chain partners have been changed Globalization and technology development.

Supply chain integration

Increasing evidence indicates that supply chain integration positively impacts supply chain performance.

However, the expansion of network and integration has brought additional dependency on supply chain stakeholders

Supply chain risks

The COVID-19 pandemic and the 2021 Suez Canal obstruction have negatively affected the supply chain worldwide.

PURPOSE

RQ1

What dimensions of supply chain integration are recognized in prior studies?

RQ2

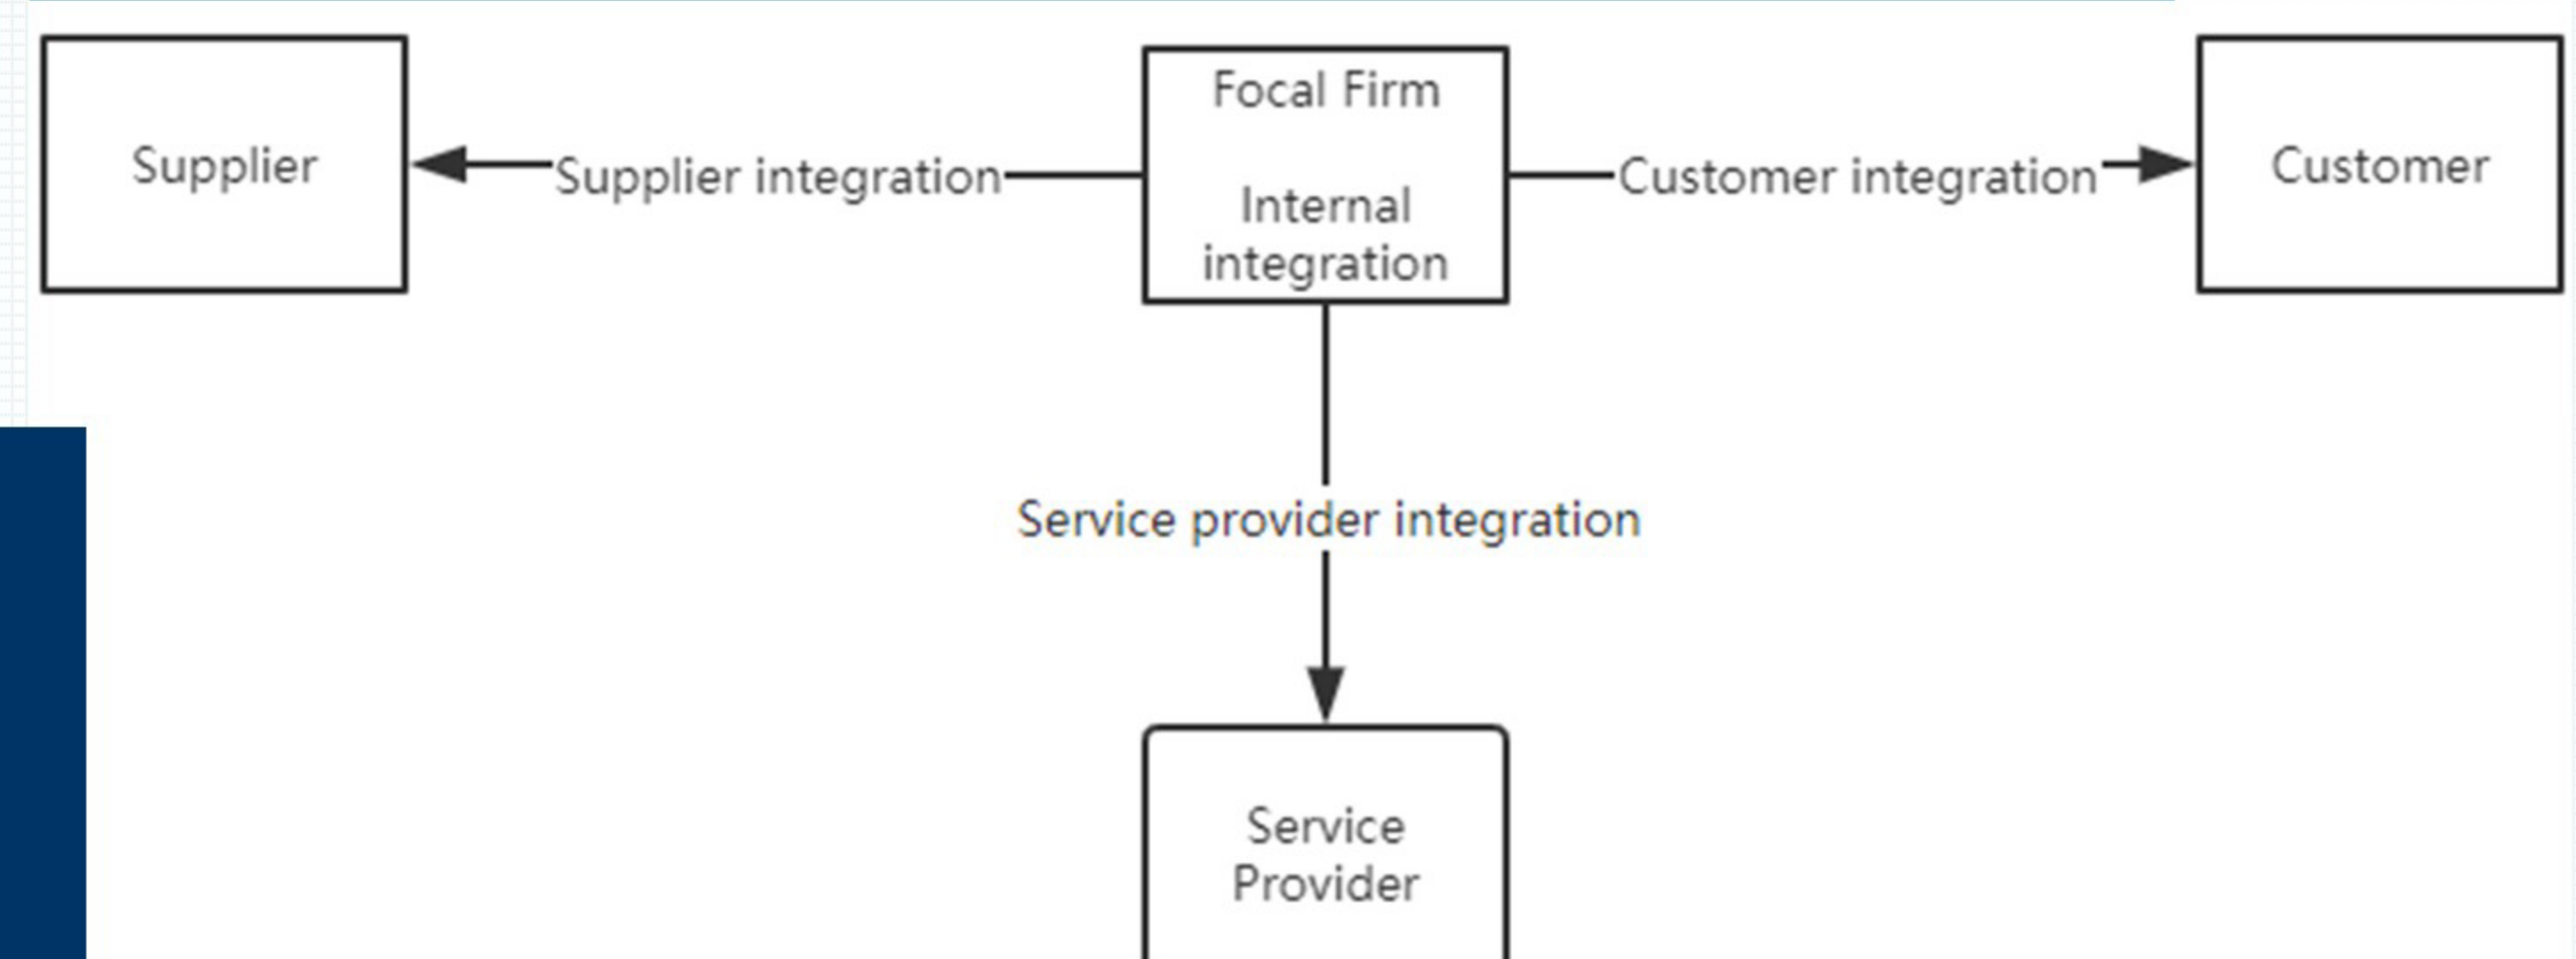

How the supply chain integration dimensions impact the supply chain in coping with supply chain risk?

METHODS

Steps	Process	Outcomes
Settling articles	Identify keywords over research themes of supply chain integration and supply chain risk.	
Article search	Searching articles in Emerald insight with keywords "supply chain integration" and "supply chain risk".	499
Exclusion	Book part, case studies, and expert briefings are excluded.	494
Inclusion	Articles were included based on following criteria: The article must have problems or issues discussed from any one of the research questions. Research premises/objective should match with the objective of the paper. The paper should have at least one subject in its research work, which are "supply chain integration" and "supply chain risk". Findings of the paper should be able to provide answers to the referred problem/research questions.	144
Critical comparison	Papers were then reviewed thoroughly, and on the basis of synthesis and comparisons, papers not related to research questions were excluded.	84
Final decision	Complete selection of research articles.	47

FINDINGS

Supply chain integration dimensions

Impact of supply chain integration on supply chain risks
